

Postdoctoral Position on Acoustic Metamaterials

We are seeking a full-time postdoctoral research assistant to join the group of “Phononics and Acoustic Metamaterials” within the “Institut Jean Lamour” at the University of Lorraine – CNRS in France. The post is fixed-term for 1 to 2 years. The candidate must have excellent skills in theoretical and numerical methods/models dealing with wave propagation in complex media. She/he has to have good knowledge of underlying physics of wave propagation in phononic and metamaterial structures. Applications in terms of low frequency sound/vibration isolation will be investigated.

Where: Institut Jean Lamour, CNRS – Université de Lorraine (Nancy).

Salary : 2100 euros net / month

Duration : 12 to 24 months

To start by : November 2014

Funding: Europe

Contact: Badreddine ASSOUAR

email :Badreddine.Assouar@univ-lorraine.fr. Phone: +33 (0) 3.83.68.49.05

Candidature : Please send your CV and a complete list of publications
